

Further advice on Financial Reports

With the signature of the grant agreement (GA) (for German and non-German recipients) the recipient has taken over several rights and responsibilities. The GA and its annexes comprise all relevant aspects and facts for the implementation of the project. The current guideline (Annex 3a) on the financial processing of the contract is a standard document of GIZ and can be found at the [GIZ website](#). The document on hand is to be understood as an annotation to this annex specifically for the European Climate Initiative (EUKI).

Supporting documents per expenditure category

Hereinafter you will find requirements for supporting documents to be submitted on request to GIZ as stated in Art. 3.9 of your GA and the requirements for the general original documentation on site. Please note that this list contains minimum requirements and that upon request further documentation might be required.

Translation of documents

- Key information needs to be translated (acc. to Art. 3.9);
- To reduce the need for manual translation, forms that are used frequently (e.g. overview sheets, tables, receipt blocks and contracts) should be drawn up in two languages. Wherever possible, both languages should be incorporated into a single form;
- In the case of longer documents (e.g. contracts) it is sufficient if the language of the country is accompanied by an identical text in one of the accepted working languages.

Corrections of Financial Reports

- In case a previous, already submitted Financial Report contains errors, please correct it with the **next financial report**. The last opportunity for correction is the Final Financial report;

- Please mark incorrect amounts as a cancellation (negative amount) and provide a specific reference to the original reporting period and a short explanation for the correction under the column *Reason for payment* in the sheet *3e_breakdown of actual costs per category*;
- If actual costs incurred in previous, already reported periods have not been claimed it is possible to enter them in the current Financial Report with a clear reference to the original reporting period

What is not eligible/ not part of a Financial Report?

This (non-exhaustive) list includes aspects that are not part of a financial report/not eligible:

- Lump sums are not considered eligible; each expenditure needs to be broken down into individual items. There are two exceptions: Pro rata local project costs and flat-rate percentage of administrative expenses (GA 3.8);
- Any expenditure incurred outside the project duration (GA Art. 1.3). To be considered eligible any expenditure needs to be made during the lifetime of the project;
- Announcing changes of more than 20% (GA Art. 1.4). Changes of more than 20% between budget lines cannot be announced in retrospect but require prior written approval by GIZ;
- Announcing major changes (GA Art. 4.3). Major changes must be reported in written form immediately to the GIZ. Such measures may be commenced only based on a revised planning and after prior agreement with the GIZ.

Common mistakes in preparing a Financial Report

- The use of non-sequential numbering in the Breakdown of actual costs per category (no. of voucher- Annex 3e);
- Reporting of total costs (including own/ third party contributions) in Annex 3e and Annex 3f;
- Reporting of expenditure not part of the project budget;
- The use of non-specific designations for expenditures/payments in Annex 3e,
- The use of different templates (e.g. old vs. new templates/different languages);
- Supporting documents are not sorted chronologically and not completely traceable to the Financial Report;
- The applied exchange rate procedure is not clear;
- Missing (second signature on the) Timesheets;
- Confusing forwarding of funds to third-party recipients with actual costs incurred.
