BG, DE, RO Status Quo Reports

MENERGERS released 3 reports:

- Review of **Bulgaria's** Experience & Legal Background
- Energy Management in **EU** and **German Municipalities**
- Evaluation of **Romania's** Energy Efficiency Progress

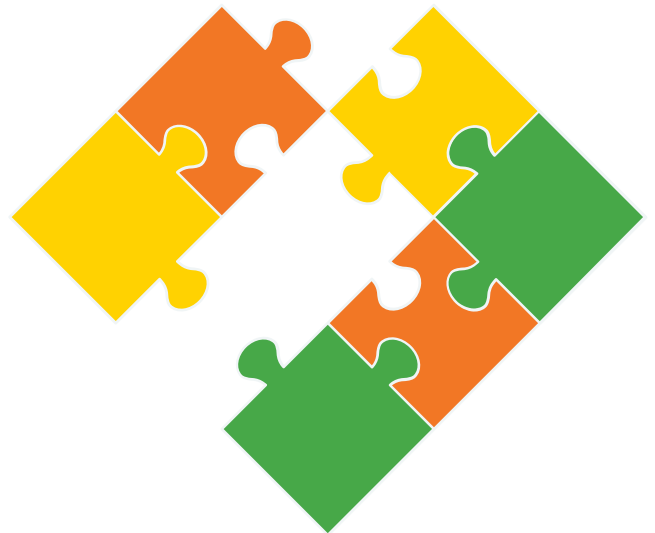

Study visits in Germany

MENERGERS supported 6 pilot cities from BG and RO, by sending municipal representatives on 2 study trips to Germany, to learn from the experiences and best practices of German municipalities.

Decoding Municipal Energy Management

The MENERGERS team identified similarities and differences in Municipal Energy Management between BG and RO, in a process of co-creating innovative solutions for identified barriers, in a workshop held in Bulgaria.

Model for Municipal Energy Manager Services

BG developed a model for Municipal Energy Manager Services, providing job descriptions, planning models, inter-institutional networks, tools for energy management at the municipal level and communication channels.

Training for the personnel

3 pilot municipalities from Bulgaria have been trained and engaged in the kick-off for the pilot implementation of the developed Municipal Energy Manager Services model.

Guide on performance indicators

RO is working on a detailed guide comprising of Energy Efficiency and Renewable Energy Sources performance indicators, developed for local public administrations, emphasizing practical aspects.
